

R8 Twin Student Branch Program

Amélie Anglade
R8 Student Branch Coordinator

What's that program about?

- Like twin towns, **pairs of Student Branches from different Sections choose to be partners:**
 - **Exchange good tips**, documents, ideas, projects
 - **Organise similar events in the same time** for a better motivation
 - This can be also used to **mentor New Student Branches**

Why should my Student Branch be part of this program?

- To **add an international dimension** to your activities:
 - **Improve your English skills ;)**
 - **Keep in touch with people you met at an international IEEE event (R8 SBC, ISBC...)**
I hope that there will be lots of Twins Portugal-Spain as a result of this Congress!
- To **find new innovative solutions** to your problems
- To **get support/motivation** from another SB

How do we join this program?

- **Send an email to r8sac@ieee.org** to register your Student Branch, containing:
 - the name of your Student Branch
 - the contact person in your SB for this program (name and email address)
 - the level of experience of your Student Branch
 - languages spoken in your SB
 - the kind of Student Branch you would like to be Twin with (experienced SB, new SB, etc.)
 - Any other relevant information

And then what?

- A list of Student Branches that are looking for a Twin is available on the R8SAC website: **iee.org/r8sac**
- Contact them
- Once you've found your Twin **let us know about your partnership: r8sac@iee.org**
- We want to know about your success stories (and about what went wrong as well)
- Let us know what else we can do for you and your Twin!

We want to hear from you!

- Anything related to your activities
- Any question
- Any problem
- Your successful events
- etc...
